

New @ Machi

Science Club for Kids

S.T.E.M Education

Science Technology Engineering Mathematics

We believe that the best way to learn Science and Math is by doing Science and Math, not by learning and memorizing it out of a book.

In our program, children apply concepts in Science, and Math to design and build their own structures and machines.

Our class presents concepts in physics and engineering that inspire creativity, problems solving and analytical thinking.

The best part is that kids are learning while having fun, and when learning is fun everyone benefits.

Call Reuven @ 289-553-3611 with questions or to register.

Give our Class a Try

Join us for a complementary first class.

Wednesday March 12th 2014 from 4pm-5-pm.

No Commitment or Obligation.

Call 289-553-3611 to register
for free session.
